DETAILED ACTION

Drawings

Applicant is required to submit a proposed drawing correction in reply to this Office action. Drawings are indiscernible. However, formal correction of the noted defect may be deferred until after the examiner has considered the proposed drawing correction. Failure to timely submit the proposed drawing correction will result in the abandonment of the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Oliver et al (US 2002/0133412 A1).

Regarding claim 1, Oliver et al teach a method for operating a computer system comprising:

- having at least one content provider coupled via a portal which may also be coupled to a user [abstact; 0118];
- the at least one content provider offering a new content to the portal [abstract; 0110];

Application/Control Number: 10/016,995

Art Unit: 2155

- the portal comparing credentials of the at least one content provider with stored credentials of registered content providers [0118; 0133]; and

- the portal accepting or rejecting at least a particular provider included in the at least one content provider based on the stored credentials [0133; 0031; 0120].

As per claim 2, Oliver et al teach a method as recited in claim 1, further comprising offering the credentials of the at least one content provider to the portal together with the new content [0133].

As per claim 3, Oliver et al teach a method as recited in claim 1, further comprising storing the credentials of the registered content providers in a database of the portal [0133; 0155].

As per claim 4, Oliver et al teach a method as recited in claim 1, further comprising performing automatically the comparison of the credentials with an intelligent program having a rule database [0161-0236].

As per claim 5, Oliver et al teach a method as recited in claim 1, further comprising performing manually the comparison of the credentials [0133].

As per claim 2, Oliver et al teach a method as recited in claim 1, further comprising the portal checking the new content, and the portal accepting or rejecting the new content [0133; 0031; 0120].

As per claim 7, Oliver et al teach a method as recited in claim 6 wherein the evaluation of the new content is performed semi-automatically or fully automatically [0162].

Application/Control Number: 10/016,995

Art Unit: 2155

As per claim 8, Oliver et al teach a method as recited in claim 6 wherein the user is notified about the new content if the new content matches with preferences of the user [0122].

As per claim 9, Oliver et al teach an article of manufacture comprising a computer usable medium having computer readable program code means embodied therein for causing operation of a computer system, the computer readable program code means in the article of manufacture comprising computer readable program code means for causing a computer to effect the steps of claim 1 [0161-0236].

As per claim 10, Oliver et al teach a computer system comprising at least one content provider which is coupled to a portal which may be coupled to a user [0296] wherein the at least one content provider comprises means for offering a new content to the portal [0296], wherein the portal comprises means for comparing credentials of the at least one content provider with stored credentials of registered content providers [0133], and wherein the portal comprises means for accepting or rejecting the at least one content provider [0133; 0031; 0120].

As per claim 11, Oliver et al teach the computer system of claim 10 wherein the portal comprises a database for registered content provider credentials [0133].

As per claim 12, Oliver et al teach a computer system as recited in claim 10 wherein the at least one content providers, the portal and the user are coupled via the Internet [0028, 0113].

As per claim 13, Oliver et al teach a program storage device readable by machine, tangibly embodying a program of instructions executable by the machine to perform method

Art Unit: 2155

steps for causing operation of a computer system, the method steps comprising the steps of claim 1 [0161-0236].

As per claim 14, Oliver et al teach an article of manufacture comprising a computer usable medium having computer readable program code means embodied therein for causing operation of a computer system, the computer readable program code means in the article of manufacture comprising computer readable program code means for causing a computer to effect the steps of claim 2 [0161-0236].

As per claim 15, Oliver et al teach an article of manufacture comprising a computer usable medium having computer readable program code means embodied therein for causing operation of a computer system, the computer readable program code means in the article of manufacture comprising computer readable program code means for causing a computer to effect the steps of claim 1 [0161-0236].

As per claim 16, Oliver et al teach a computer program product comprising a computer usable medium having computer readable program code means embodied therein for causing operation of a computer system, the computer readable program code means in the computer program product comprising computer readable program code means for causing a computer to effect the functions of claim 11 [0161-0236].
